

# THE RISK OF DESIGN LIABILITY ALL TOO OFTEN LURKING IN PROJECT PLANS AND SPECIFICATIONS... AND HOW TO MANAGE THE RISK

**April 26, 2017 \* 8:30 a.m. - 10:00 a.m.**

**EMU Livonia, 38777 Six Mile Road, Suite 400, Livonia, MI 48152**

## **THIS PROGRAM**

The program begins with a review and summary of the contract terms and conditions that can saddle construction managers and even traditional design-bid-build contractors with liability for design defects. Quickly turning focus to the project plans and specifications, and mid-course corrections, that can also leave such companies liable for design errors or omissions.

In-house lawyers and risk managers rarely have either the expertise or the time to review plans or specifications, and they cannot be there to advise the field every time a client “merely” asks for “a little help” in dealing with design omissions, or unforeseen site conditions.

Come and join in this effort to identify and develop practical steps to reduce or avoid risk. Discover the practices, protocols and procedures that can help contractors.

### ***WHO SHOULD ATTEND:***

Construction managers, contractors, project engineers, project managers, field engineers, superintendents, foreman, and other professionals seeking additional information about the risk found in plans and specifications.

### ***THE PRESENTERS:***

#### **Matthew Smith**

Member at Clark Hill, PLC
